

NOARDA RAIN BARREL AND COMPOST BIN TUMBLER SALE

What is a rain barrel? Rain barrels collect run-off water from your home's roof so that you can use it later for watering plants/gardens, washing your car and further reducing your water bill. They also prevent polluted runoff from getting into our rivers and streams. Rain barrels conserve water and help lower costs.

Residential water use increases 40-50% in the summer months due to outdoor water use.

You could collect 200+ gallons of water from just 1/4 inch rainfall on the average home.

Details

Rain barrels are 55-60 gallons and include spigot, linking fitting at bottom end, overflow fitting near top and screen enclosure for top. Additional accessories available for purchase as noted on order form. All barrels are 35-40 inches tall.

Why should I purchase a rain barrel or compost tumbler from NOARDA?

NOARDA is a local non-profit organization dedicated to improving the North Aurora riverfront area; we will provide village residents with a dynamic and lively public gathering space that embraces and connects the environmental features of the North Aurora riverfront.

Our rain barrels and composters are 'upcycled' meaning you are **going green twice**. Upcycling is the practice of taking something that is throwaway and repurposing it into something of greater utilization and intrinsic worth. The barrels were previously used for food product shipping; they have been sanitized and converted into rain barrels by a local business.

Price! Because we want to help North Aurora's water supply too we are offering these barrels at a remarkable price; \$75 each or 2/\$130. The compost bin tumblers are \$140.00. We will deliver your rain barrel(s) or composter to your North Aurora address for only \$5/household. You can pay by cash, check, or PayPal (visit www.noarda.org to pay with PayPal).

Compost Bin Tumbler

Eliminate back strain with this hip-level compost bin tumbler. It is made with recycled components, including a pre-used 55 gallon black barrel and 100% recycled lumber painted with water based exterior latex paint. It is about 4 feet tall and only requires a 3 foot by 4 foot area. The product in the barrel can be completely composted in about 4 weeks. The composters are shipped with all pieces in a kit inside the barrel.

Compost Tumbler Features and Benefits:

Holds an impressive 7.3 cubic feet of material!

Low maintenance, nothing to clog up.

Center tube aerates the compost pile and allows excess moisture to drain out.

Steel bars inside break up the compost and fluff it up for better aeration.

Pest proof, fully enclosed, off-the-ground compost bin.

The black barrel provides insulation to aid heating of compost.

Compost Tumbler can be moved around the yard.

Assembled dimensions: 36" wide by 36" deep by 46" tall

Weight: 75 lbs

5 year manufacturer's warranty
